

Data Validation

Create a dropdown list for the 'Department' column with values: HR, Finance, IT, Sales.

Solution: Select Department column → Data → Data Validation → List → Enter values HR, Finance, IT, Sales.

Restrict 'Age' column to accept only numbers between 18 and 60.

Solution: Select Age column → Data Validation → Whole Number → Between 18 and 60.

Ensure 'JoiningDate' column only accepts dates after 01-Jan-2020.

Solution: Select JoiningDate column → Data Validation → Date → greater than 01-Jan-2020.

Restrict text length in 'PhoneNumber' column to exactly 10 digits.

Solution: Select PhoneNumber column → Data Validation → Text Length → Equal to 10.

Create a custom validation so that 'Salary' column must be greater than 2000.

Solution: Select Salary column → Data Validation → Custom Formula → =B2>2000 (adjust range).

Restrict input in 'Department' column to only HR, Finance, IT, Sales (no other values).

Solution: Select Department column → Data Validation → List → HR, Finance, IT, Sales.

Allow only weekdays (Mon-Fri) in 'JoiningDate'.

Solution: Select JoiningDate → Custom → =WEEKDAY(A2,2)<6.

Apply a rule where 'Salary' must be a multiple of 100.

Solution: Salary column → Custom → =MOD(E2,100)=0.

Prevent duplicate entries in 'EmployeeID'.

Solution: EmployeeID column → Data Validation → Custom → =COUNTIF(A:A,A2)=1.

Show an input message in 'Age' column guiding user to enter between 18 and 60.

Solution: Age column → Input Message → Enter Age between 18 and 60.

Create a validation where 'Bonus' cannot be negative.

Solution: Bonus column → Custom → $=E2 \geq 0$.

Restrict 'Name' column to maximum 20 characters.

Solution: Name column → Data Validation → Text Length → Less than or equal to 20.

Allow only values 'Yes' or 'No' in a new column 'Active'.

Solution: Active column → Data Validation → List → Yes, No.
